

How to Spot Misinformation (Team 3)

- Check who made the post. Unknown or strange pages can be risky.
- Look for the date. Old news can be shared again to confuse people.
- Search for the same story on other websites. If only one page shares it, be careful.
- Check if the photo looks real. Some photos are edited or taken from other events.
- Read the comments. Sometimes others already noticed mistakes.
- Avoid posts that try to make you very scared or shocked.
- Always open the full article. Headlines can be misleading.
